

In order to increase the amount of natural light reaching number 17, we are interested in transitioning to a hipped roof design.

To improve the aesthetics of the building we would like to clad the first floor walls: (front, back and both side elevations) with tiles. In the current design only the front gable is clad and the remaining walls are brick.

In response to privacy comments in [1] this walkway has been reduced from 3.6m to 1.6m and will no longer be used as a patio.

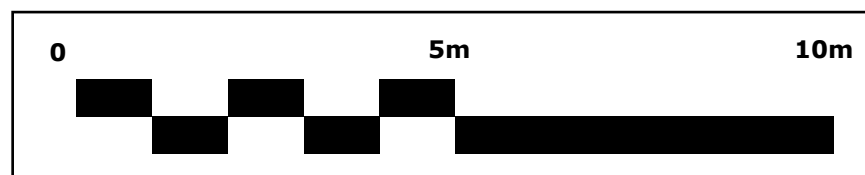

Instead, we propose that we build a 3.6m patio at the edge of the lawn.

To improve the aesthetics and thermal efficiency of the new building we would like to feature a white rendered finish on the ground floor. There are many other houses on Downs Avenue that follow this design pattern and a selection of these homes are shown in the additional information document (19DA-PL-08-AI) included with this submission. The proposed materials list remains unchanged.

Reference Documents:
 [1] Planning Application - 23/00079/FUL
 [2] Release of Conditions - 23/00892/COND

Important Points:

- A. Copies of the approved plans are featured in references [1] and [2] as well as included with this application and are labelled "Approved Document".
- B. It is worth noting that there are no alterations to the overall dimensions (height, width, and depth) of the building. The proposed materials also remain unchanged.
