

In order to increase the amount of natural light reaching number 17, we would like to transition to a hipped roof design.

To improve the aesthetics of the building we would like to clad the first floor walls: (front, back and both side elevations) with tiles. In the current design only the front gable is clad and the remaining walls are brick.

Reference Documents:
 [1] Planning Application - 23/00079/FUL
 [2] Release of Conditions - 23/00892/COND

Important Points:

- A. Copies of the approved plans are featured in references [1] and [2] as well as included with this application and are labelled "Approved Document".
- B. It is worth noting that there are no alterations to the overall dimensions (height, width, and depth) of the building. The proposed materials also remain unchanged.

To improve the aesthetics and thermal efficiency of the new building we would like to feature a white rendered finish on the ground floor. There are many other houses on Downs Avenue that follow this design pattern and a selection of these homes are shown in the additional information document (19DA-PL-08-AI) included with this submission. The proposed materials list remains unchanged.

To make better use of the Arts and Crafts porch this ground floor wall has been extended by 1m to be level with the front of the building. The first floor remains unchanged.

Amended Proposed Front Elevation
