## Sustainability Statement - minor applications

Sustainability standards		Yes	No		
A Net zero carbon					
1.	Has the building fabric been designed to standards of ultra-low energy demand?		$\checkmark$		
	not practicable, nor proportionate for minor extension to existing listed property				
2.	Has thermal comfort and the risk of overheating been assessed and passive design measures been prioritised?	$\checkmark$			
	Thermal mass retains heat and secure cross ventilation/purge ventilation measures adopted	cross ventilation/purge ventilation measures adopted.			
3.	Is the development fossil fuel free?		$\checkmark$		
	not practicable, nor proportionate for minor extension to existing listed property				
4.	Will a net zero operational carbon balance be achieved and 100% of energy consumption delivered using renewables?		$\checkmark$		
	not practicable or proportionate for minor extension to existing listed property, however electric-fed systems to new development will become greener as the national electric grid becomes similarly so.				
5.	Will embodied carbon emissions be minimised?	$\checkmark$			
В	Extension to existing property will effectively improve the thermal performance of the existing external wall to which it is attached, new thermal elements specified to surpass current building regulations requirements B Travel				
1.	Is home working supported?	$\checkmark$			
2.	Has active travel been prioritised?		$\checkmark$		
	not practicable for minor extension to existing listed property (dwelling)	·			
3.	Is shared mobility facilitated?		$\checkmark$		
	not practicable for minor extension to existing listed property (dwelling)				
4.	Will electric vehicle charging infrastructure be provided?	$\checkmark$			
	EV Charging to be installed serving private driveway.				
C Water					

L.	Will water consumption be minimised?	$\checkmark$			
	Provisions of current Building Regulations Approved Document G (Sanitation, hot water safety and water efficiency) to be satisfied.				
2.	Will water be conserved through rainwater harvesting or grey water recycling?	$\checkmark$			
	Retain 3no. existing rainwater butts to outbuildings in garden considered proportionate measure.				
3.	Has the flood risk assessment accounted for climate change and is sustainable drainage proposed?	$\checkmark$			
	no change to existing dwelling drainage provision.				
D Waste					
Ι.	Will the construction company be registered with the Considerate Construction Scheme?		$\checkmark$		
2.	Will a Site Waste Management Plan be followed and targets set for construction waste recycling and disposal?		$\checkmark$		
3.	Will there be safe and convenient access to waste recycling?		$\checkmark$		
E Voluntary sustainability standards I. Will non-domestic development be BREEAM certified?					
2					
2.	Will the development receive a sustainability accreditation and/or follow recognised sustainability principles?				
	not applicable				
F Only for development affecting heritage assets or traditional buildings					
Ι.	Have the heritage value of the building(s) and impact on any heritage asset been appropriately assessed?	$\checkmark$			
	Refer Heritage Report and Impact assessment	1			
2.	Is a whole building approach being taken?	$\checkmark$			
	Minimal work to heritage asset (listed building) proposed				
3.	Will responsible retrofit measures be adhered to?	$\checkmark$			
Minimal work to heritage asset (listed building) proposed, works within outbuildings designed to avoid adverse affect on existing building fabric (exposed stonework)
