About this product

The National Trust Hexagon Insect House is an attractive and sturdy FSC timber house which is great for attracting a multitude of different garden invertebrates such as solitary bees (which do not sting), spiders, ladybirds (which are great for keeping aphids in check), lacewings and more. Insect houses provide a great opportunity for children to watch and learn about the lifecycle of these important and beneficial invertebrates.

The National Trust Hexagon Insect House can be placed in your garden, on walls, on sheds, and even balconies up to 3 stories high. For best results place in a sunny, sheltered location near vegetation, preferably no higher than 2m.

Specification

Approx 18cm x 16cm x 8cm.
