

Client - Mr Mills, 6 West Coombe, BS9 2BA

T1 & T2. Horse Chestnut tree. C/R by 1.5m and remove any deadwood.

These trees were topped over 20yrs ago. There is extensive decay in the main stem where the 'new' crown is attached. These trees have had pruned every 4yrs to prevent the crown from getting too 'heavy' and leading to limb loss. These pruning works are to continue that management cycle in order to preserve these trees for the foreseeable future .
