

The Street Shelter provides parking for 5 bicycles. Its low profile design helps it blend into its surroundings, meaning it's well suited to public areas or street locations. Two boxes (storing 10 bicycles) can fit in a single car parking space.

The shelter is very quick and easy to use, and provides a secure and weatherproof storage area for bicycles. The main shelter has a key or programmable card lock for communal use.

The internal rack mounts provide secure locking points for both the wheel and frame of the bicycles (user provides their own lock). The rack securely holds the bikes so that they do not come into contact with each other.

FEATURES

- Provides a secure and weatherproof location for bikes
- 5 bike internal rack for organisation
- Two modules (providing 10 bike spaces) fits into 1 car parking space
- Maintenance free
- Multiple locking options
