Hi,

I put the reason for works after each tree's specification in the description area. I have copied below;

Tree 1: Scots Pine – Fell - Works are to allow more light into the borders below and more space for the surrounding mature trees.

Tree 2: Sweet Chestnut – Fell - The tree has little space to develop, its removal will allow more space for the surrounding trees in an over-crowded area of the garden.

Tree 4: Silver Birch (sapling) – Fell

Tree 5: Oak (sapling) – Fell

Tree 6: Scots Pine (Dead) – Fell Works to trees 4,5 & 6 are to allow more light and space to the adjacent Katsura tree and prevent these saplings from potentially dominating the area.

Tree 7: Beech – Clear small diameter limbs from the BT line to establish a 50cm clearance of the line. Works are to prevent damage to the BT line.

Tree 8: Oak – Reduce limb extending towards the front right corner of the house by approximately 1.5m back to the primary branch. Leaving a retained branch length of approximately 7-8m. Works are to establish adequate clearance from the roof of the house.

Look forward to hearing from you.

Many thanks,

John
