

VELUX GPL MK08 SD5N3

Opening outwardly at 45° is easy for this GPL MK08 SD5N3 conservation window from VELUX. Double glazed with a lacquered pine finish, the window can be utilised as a fire escape if necessary and is perfect for roof pitches between 20° and 55°.

The outward opening means that views are fully visible without obstructions and the 180° rotation feature eases maintenance. Alongside the variety of New Generation features, including fantastic insulation materials and ventilation, this window is fully comprehensive. It provides more daylight with slim profiles and up to 18% more pane, while also having attractive finishes and commendable operation control.

Features & Benefits: VELUX GPL MK08 SD5N3 Conservation Window for 8mm Slates - 78cm x 140cm

- Commendable insulation and ventilation
- Suited for use with roof pitches that are 20° up to 55°
- Slim top covers
- The - -70 glazing enhances safety and dampens sound
- Easy to clean and install
- Click-on caps for fewer screws during use

- Opens outwardly for clear views
- Triple lacquered pine finish
- 10-year guarantee on windows and flashings

The natural pine core is coated with a triple layer of clear lacquer, in turn maintaining the quality of the window's timber. The control bar at the top allows constant ventilation on windows that are opened or closed. With a 6.4mm laminated inner pane and a 4mm toughened outer pane (with low-E coating), the window is great in terms of safety.

Standards & Certification

- BBA certified.

Please note:

- This conservation window comes with a glazing bar and a flashing kit for recessed slates up to 8mm thick (EDN).
- Special springs can be fitted to these windows for use with roof pitches between 55° and 75°. If this is desired, please specify it in the 'Special Instructions' box at checkout.
