

We believe we have a dead Ash Tree in our garden, on the western edge of the property, on the perimeter border .

The tree is approximately 1 metre away from the B6277, Romaldkirk to Mickleton Road.

At a height of 1.2 metres , the tree is 18cm wide , and has a total height of approximately 30 feet.

The tree has not produced any leaves in the past 3 years and has no sign of growth and therefore, we believe the tree is dead.

Photographs taken today 1st November, are attached to this document.

We have concerns that if the tree were to be blown over it may fall onto the adjacent road.

We await your response.

Regards

John and Frances Eaton
