Subject: Re: Tree Works Application TWA/23/0239

To whom it may concern,

Please find notes attached in answer to questions.

→ for tree T1 - please identify the branches which are to be reduced (pruned back), either via an annotated photograph or sketch, and provide the measurements, in metres, of those limbs both pre and post works being undertaken;

Current limb lengths approx 6m, to be reduced by up to 1.5m leaving limbs of approx 4.5m

The limbs to be reduced are on the East and West side of the canopy only.

→ for Tree T2 - please confirm whether this is a crown thin (stated as 15%) or crown reduction being applied for - if the latter, please provide the measurements, in metres, of the current crown spread and tree height, as well as the final crown spread and tree height following works being undertaken (eg. 18m in crown spread and 20m in height and so a final crown spread of 16m and 18m in height on a 2m all over reduction);

Application is for both a crown thin of 15% and crown reduction of selected limbs that extend outside the main canopy by up to 1.5m only. Current limb lengths approx 6.5m to be reduced to approx 5m. Approx current height 17m to reduce to 15.5m and current spread of approx 10m to reduce to approx 8m.

→ for Tree T2 - Reduction of selected over extended limbs: please identify the branches which are to be reduced (pruned back), either via an annotated photograph or sketch, and provide the measurements, in metres, of those limbs both pre and post works being undertaken;

see above note

→ for Tree T3 - please provide the existing height of the tree (prior to works being undertaken).

current height approx 8m

Kind regards

Andrew
