

FRONT FACADE

Archaeology Public Board. 1200x900mm.  
 This board will be printed on a high-durability aluminum sign.  
 The chosen artwork should offer a surface that is not only robust but also easy to clean. It must be resistant to UV rays and frost. Additionally, it should feature an anti-graffiti finish and ensure excellent colour reproduction.  
 The display board will be mounted using an aluminum standoff, which will be screwed directly to the wall. This will position the board away from the wall for added prominence.  
 The board's location will be between the main entrance and a window on the ground floor of the north facade."
