Made from Recycled Plastic

Trulawn Harmony is made from 80% recycled plastic from the agricultural industry, with only 20% of unrecycled plastic used to ensure UV protection and longevity. With a ten-year guarantee against UV fading and degradation, choosing a more environmentally friendly artificial grass means no sacrifice in performance.

100% Recyclable

Every element of Trulawn Harmony, from backing to blade, is made from the same group of plastic polymers. This means that none of the grass has to be separated, so every component of plastic could be recycled to reduce plastic waste!

Latex Free Benefit

Trulawn Harmony uses polypropylene dispersion technology to keep the stitches secure and avoid the use of latex. One of the advantages of not using latex, is that the product retains even less moisture when exposed to liquids. This is a great benefit to pet owners who are trying to avoid urine associated odours. Whilst there is only a small chance of odour retention with our standard range anyway, the chance is even less with Trulawn Harmony.

Customer reviews

Absolutely brilliant Adam and Jake were amazing! So so pleased with their work and what a pleasure it was to have them here. I'd give...

Jill , Luton – 12 months ago

The whole service was great from the representative to the grass to the fitters

Suzanne , Enfield – 1 year ago
