- Free Standing
- Pressure treated timber from renewable sources
- Flat packed with clear easy to assemble instructions, fixtures and fittings
- Automatic bin lid opening via connecting chain
- Made in UK
- 10 year guarantee

Why a Bin Store?

Let's be honest here, bins are unsightly. Nearly everyone these days has council wheelie bins and maybe even recycling bins too, but nobody wants to look at them. They're ugly, they smell bad, and they take away from the kerbside appeal of your property. That's where a bin store comes in. This lets you hide those bins away, and yet you'll still be able to get to them easily when you need them.

How Big?

This chest is a triple, so it's designed to fit three bins, either traditional wheelie bins for a large family or wheelie bins plus large recycling bins. Wheelie bins do come in different dimensions though, so you'll need to measure your bins and decide which size is right for you. At the bottom of this page there is a size guide if you are unsure. The standard household bin is 240 litres so in most cases that's the one you'll need but please do check. We stock the Bellus triple in three main sizes:

Standard Sizes

Triple Wheelie Bin Storage for 3 x 140 Litre Bins

- External Product Dimensions: 1200 x 1820 x 640 mm (H/W/D)
- Internal Product Dimensions: 1090 x 540-540-540 (Each Compartment) x 570 mm (H/W/D)

We can also offer a custom storage unit for three 360 litre wheelie bins. Please [contact us](#) for more information.

What Kind of Materials?

This is no shoddy product. You don't want to make an investment like this only to have your bin store fall apart! This triple chest store is made from the highest quality pressure treated redwood. For you that means durability, since redwood is the hardest soft wood, and that pressure treatment makes the wood more impervious to damp. Whether your store is sitting in rain, snow or burning sun, it'll be a long time before you need to buy a new one. You might want to treat the chest with stain once a year though, just to keep it looking fantastic.

Did we mention this is a UK product? Made in the Ribble Valley, Lancashire, this chest lets you support the domestic economy. Want to support the environment too? Then don't worry, since all the high quality wood used here comes from renewable resources.

What Else Should I Know?

There are a few more things that you should know about this great bin store. Firstly, that lid is sloped gently to either side, so rain and snow slide right off. The lid also features a connecting chain that lets you attach the lid of the bin to the lid of the store, you can then lift both lids with one hand, so you won't need to put that rubbish bag down on the floor.

What about when the bin men come? Not to worry, there are three individual front opening doors that make it easy to roll your bins in and out. Those doors bolt too, though if you want some added security you can opt for a hasp that will let you padlock the doors – we can fit this for a nominal cost so just send us a message prior to ordering. All bolts, hinges and handles are made from long lasting metal.

Finally, the bin store is self standing, meaning you can really put it anywhere you like. But if you worry about theft or live on sloped ground you can anchor the store to the ground if you prefer.

Bottom Line Time

Sick of the sight of those bins? Then grab this Triple Chest Wheelie Bin Store while you can! It's supplied flat packed with easy to follow instructions, and it'll only take you an hour or two to build. Finally you can have a great looking garden without those stinky bins standing around!
