Wednesday, September 13, 2023

Dear ,

Further to my site visit at the above address I can confirm that Cut Above Tree Management Ltd. recommends the following tree work in the front and rear garden of the property above.

- T1 - Date Palm 9m tall. Remove to ground level as its growing too close to the house.
- T2 - Medium Ash tree. Historically been pollarded to 4m. Canopy currently at 8m high. Section fell to ground level and poison stump.
- T3 - Medium Weeping Willow tree approximately 8m tall and 10m in diameter. Tree is dominating garden. Section fell to ground level and grind stump.
- T4 - Palm tree 4m tall. Tree is under weeping willow tree and does not look very attractive. Section fell to ground level and grind stump.
- T5 - Small Bird Willow tree at 4m tall. Remove and grind stump.

If you need any further information, please feel free to contact me on my mobile at the bottom of this page.

I look forward to hearing from you.

Kind regards

Hamish Lodge
