FAO: Mr Piers Verey

Re: Phase II Site Investigation at Merston Valley Nursery, Main Road Merston, PO30 3DE

A site investigation was undertaken in line with the proposals of Phase I Desk Study (reference 18-09-04 Revision 1). The aim of the investigation was to determine if the adjoining tanks have impacted on site soils. The investigation comprised of the excavation of two trial trenches along the boundary adjacent to the subject tanks.

The fieldwork was undertaken on the 7th August 2023, the site investigation layout and detailed trial pit section sheets; along with chemical test certificate is attached. The trial trench on the northern boundary of the boiler house was split two sections (TT102A and TT102B to avoid services in that area).

General Sequence

TT101 was undertaken within the glass house on the eastern boundary of the tanks. The sequence encountered was brown/orange/red SAND to termination depth of 0.80mbgl.

TT102A was undertaken on the northern boundary of the boiler house. The strata encountered were grassed brown sandy TOPSOIL with occasional brick and timber (MADE GROUND) to 0.20mbgl. This was underlain with brown/orange/red SAND to 0.80mbgl.

TT102B was grassed brown TOPSOIL to 0.02mbgl over CONCRETE to 0.25mbgl. Brown silty gravelly SAND (gravel was chalk) was then encountered to termination depth of 0.80mbgl.

TT102 was slightly shorter in length than proposed to avoid damaging services. TT102 is described above as A and B as the western half of the trial pit was surfaced with thin layer of grassed topsoil over concrete. The eastern half of the trench did not contain concrete.

Chemical Laboratory Testing

Representative samples recovered during the site investigation were dispatched daily under their 'Chain of Custody' protocols to the Environmental Laboratory Limited (a UKAS and MCERTS accredited laboratory.

Demeter Environmental Ltd
Head Office:

Six subsamples of soil were analysed for Hydrocarbons (TPHCWG), VOC's, SVOC's.

Assessment of Potential Polution Linkages

The chemical test certificate is attached, all TPHCWG fractions were below the limit of detection.

All results from the VOC suite were below the limit if detection and no TIC compounds were detected.

Whilst all results from the SVOC were below the limit of detection a number of TIC compounds were identified at concentrations above the limit of detection, namely:

Sample Location		TT101A	TT101B	TT101C	TT102A	TT102B	TT102C
Sample Depth (m)		0.50	0.40	0.55	0.40	0.40	0.50
2-Propanol, 1,1'-oxybis-	mg/kg	1.35	0.37	-	0.48	-	1.25
1-Propanol, 2-(2-hydroxypropoxy)-	mg/kg	1.92	-	-	0.99	1.06	2.38
Caprolactam	mg/kg	2.93	0.77	-0.62	1.71	1.23	3.12
Acetyl valeryl	mg/kg	-	-	0.09	-	-	-
Pentane, 2-isocyano-2,4,4-trimethyl-	mg/kg	-	-	-	0.35	-	-
Triacetin	mg/kg	-	-	-	-	-	0.13

A literature review of the six chemicals did not identify any connection with them and toxicological data was limited to caprolactam where the Oral TDI of 500ug/kg bw/day was given on the IRIS database.

No fate and transport data could be sourced for caprolactam and based on the relatively high TDI the concentrations the samples are unlikely to represent a risk to human health.

Based on the above the tanks have not impacted site soils and the site is suitable for use, however it is advised that as part of the development once Plot 6 is cleared that additional samples of the exposed soils are taken to ensure that the SVOC's are limited to the western boundary of Plot 6.

If you have any queries, please do not hesitate to contact the undersigned.

Yours sincerely,

Paul Hadjikyriacou MPhil MPhys MRes(Contaminated Land Management) MInstP

Tests marked N are not UKAS accredited

Report Information

Report No.: 23-49499, issue number 1

Key

U	hold UKAS accreditation
M	hold MCERTS and UKAS accreditation
N	do not currently hold UKAS accreditation
^	MCERTS accreditation not applicable for sample matrix
*	UKAS accreditation not applicable for sample matrix
S	Subcontracted to approved laboratory UKAS Accredited for the test
SM	Subcontracted to approved laboratory MCERTS/UKAS Accredited for the test
NS	Subcontracted to approved laboratory. UKAS accreditation is not applicable.
I/S	Insufficient Sample
U/S	Unsuitable sample
n/t	Not tested
<	means "less than"
>	means "greater than"
LOD	LOD refers to limit of detection, except in the case of pH soils and pH waters where it means limit of discrimination.
	Soil sample results are expressed on an air dried basis (dried at < 30°C), and are uncorrected for inert material removed.
	ELAB are unable to provide an interpretation or opinion on the content of this report.
	The results relate only to the sample received.
	PCB congener results may include any coeluting PCBs
	Uncertainty of measurement for the determinands tested are available upon request
	Unless otherwise stated, sample information has been provided by the client. This may affect the validity of the results.

Deviation Codes

a	No date of sampling supplied
b	No time of sampling supplied (Waters Only)
c	Sample not received in appropriate containers
d	Sample not received in cooled condition
e	The container has been incorrectly filled
f	Sample age exceeds stability time (sampling to receipt)
g	Sample age exceeds stability time (sampling to analysis)

Where a sample has a deviation code, the applicable test result may be invalid.

Sample Retention and Disposal

All soil samples will be retained for a period of one month
All water samples will be retained for 7 days following the date of the test report
Charges may apply to extended sample storage

TPH Classification - HWOL Acronym System

HS	Headspace analysis
EH	Extractable Hydrocarbons - i.e. everything extracted by the solvent
CU	Clean-up - e.g. by florisil, silica gel
1D	GC - Single coil gas chromatography
Total	Aliphatics & Aromatics
AL	Aliphatics only
AR	Aromatics only
2D	GC-GC - Double coil gas chromatography
#1	EH_Total but with humics mathematically subtracted
#2	EH_Total but with fatty acids mathematically subtracted
_	Operator - underscore to separate acronyms (exception for +)
+	Operator to indicate cumulative e.g. EH+HS_Total or EH_CU+HS_Total
MS	Mass Spectrometry
