

### Tree Information

With regards to a tree survey, I see absolutely no reason or justification for why this would be required as there are no proposed groundworks for this application; I should also add this was never requested on the previous application which was recently withdrawn.

I have attached existing photos of the front & rear of the property; as you can clearly see there are no trees whatsoever that will be affected by this application and, to reiterate my previous comment, there are no groundworks associated with the proposed works either.
