PC-4	48" (4f) 	Black or Light Grey	Clear or Brown
PC-5	59" (4.92f) 	Black or Light Grey	Clear or Brown

## What is **POLYCARBONATE AWNING**

Polycarbonate Awning is lightweight and impact resistant awning system. It is widely used for windows, doors, balconies, patios, terraces, shop-fronts, etc. It is an easy and economic protection for any residential, commercial, public or industrial buildings from UV-ray, heat, rain, snow, and ice. In addition, its shape and material offers stylish design and decoration solutions for modern construction fields.

## **SOLID** and **EASY** Protection

Canofix's advantage is fully customizable sizing and bracket position placement. Canofix brackets are made in polycarbonate as well, and gives strong hold to your wall under heavy rain or snow as long as the installation is done properly. It is made light-weighted and easy to assemble for DIY installation.

## **NO LEAK** Between Brackets

To make it simpler and easier for proper installation and shipping, one piece polycarbonate panel can be delivered up to **92ft (1,104")** rolled. It is made without any panel cut. So there will be no leak between brackets when raining or snowing. Shipping has never been simple for larger sizes.
