

**Photo Evidence as @ 8 November 2023**

Solar Panel + Rails height = 100cm max

Side view indicating distance of existing rear brick wall from boundary hedge

Side view showing veranda area and existing brick-built side extension

Rear/side view showing existing void space for proposed In-fill rear extension

Front view from public pavement indicating distance to front door / proposed porch

Side on view of front entry indicating depth /projection of existing bay windows (porch depth to match)

Rear/side view with an illustration of the proposed in-fill rear 'single storey' extension (height to match existing single storey extension to right) – exterior walls to be rendered in soft white – with wood composite cladding applied to exterior of garage section + existing side extension + proposed rear in-fill extension.
