

## Bat access tile for slated & tiled pitched roofs

£36.30

Bat access tile for slated & tiled pitched roofs

The Bat Access lead tile allows bats a pathway for roosting bats either under the tiles against the bitumen felt or through in roof spaces / lofts / attics. Made from sheet lead flashing to - BS EN 12588.

Just Lead and the Bat Conservation Trust (BCT) agree to work together within the Roost Partnership scheme which focusses on improving opportunities for bats within our built environment. The Roost Partnership also acts as an information sharing hub used to gather feedback from industry professionals to constantly improve our understanding of bat roosting requirements.

In addition to the enhancement benefits for bats there is a legal requirement to protect bats during building maintenance and construction, where tiles may be required as mitigation under advice from a bat ecologist: <https://www.bats.org.uk/advice/bats-and-the-law>
