

Dear sir/madam

I Maureen Lewis have recently had a <sup>privacy</sup> timber fence erected to the drying area at the South West of my property to which I own, I was not aware that I needed to have permission for this as I am the last person on the entire street to do this, and my timber fence co-insides with all the rest, this fence has been professionally built by Rever Landscapes using pressure treated redwood from Robertsons Timber LTD. The fence itself is only 4ft in height with the boundary wall at the bottom bringing it to 6ft, this is at same height as all the other fences on the street and if was forced to bring down in height I believe it will look odd and out of place, I would ask that I get to keep the height its at in order with rest of street.

I have enclosed photo of said fence along with fee of \$300 for Application

yours faithfully

P.S. The person making the initial complaint is currently living in Australia and has done for the past 10+ years
