Adjoining Ebley House to the south west of the property lies the Conservatory. The Conservatory sits in a poor state of repair, requiring works to ensure its future use. The Conservatory comprises of two adjoining rooms, one featuring a porch entrance from the driveway. To the rear of the Conservatory there is a room backing onto the adjacent car park which has a half height retaining wall.

Why is it necessary to demolish or extend (as applicable) all or part of the building(s) and or structure(s)?

The existing, much altered, Conservatory is in a very poor state of repair (for the reasons listed below). It is proposed that the Conservatory is replaced with a new lightweight structure, based on the form of the original conservatory.

- Deteriorating and rotting structural timber. Structure is now currently supported with acrow props.
- Large amount of single glazing and no insulation. The space requires heating to retain at a comfortable temperature for use, which is currently a significant cost to the charity.
- Pitted and deteriorating stone work to plinth of the conservatory.
- Excessive damp and mould growth to the rear where building meets neighbouring garage.
- Additional steelwork to support the roof. Glazing removed from the roof and replaced with heavier tiles which have compromised the structure.
- Concrete screed and laminate flooring covering.

Pre-application reponse following a site visit was positive with no concerns over the proposals at the pre-application state. Case officer noted that the existing conservatory is in a very dilapidated condition and much altered. Officers have no objection to its loss and noted the scheme for the replacement structure would be appropriate and indeed be considered an enhancement.
