## Heritage Impact Statement

Stoke Hall

East Stoke

Notts

NG23 5QB

24.10.23

With regard to the impact that the work proposed to be carried out at Stoke Hall

In respect of moving the kitchen from its current location to the adjacent room, changing the use of the current room laded dressing room, on the plans provided, to a utility room and the addition of new internal stud walls allowing en-suits to bedrooms, 1,2,3 & 4.

I can confirm that the proposed alterations will have no impact on any part of the house or will impact its heritage or the fact it is a grade two listed building. Should the rooms ever to revert back to their original state, they would be able to do so easily and without impact again. All new plumbing or electrical work has accessibility through the cellar or the void between the ground and first floor. There is no wall panelling, fireplaces or other items in said rooms that are of heritage that will be affected either during the proposed work

Many thanks

Sam Rose
