ref: 23/0166/PEND

Many thanks for your request for further information please find below our responses.

Works to x12 Lime trees covered by TPO 02/1997 at 5 & 6 Old Convent Fields Wisbech  
Cambridgeshire PE13 1HT

NOTE planning says x26 lime Trees this is not correct it is 12 limes in front of No.6 old Convent Fields

In regards to your request below for further information:

The description of the proposed works is too vague, we need know the amount of the proposed works (e.g. cut 2m off lateral spread or raise crown to 4m etc). Please can you be more specific in your description, and if you are not able to provide this information within the form then as a separate document.

Our response is as follows:

The yearly lateral spread which is currently between 1m and 2m (1 year's growth) will be cut back to the tree trunk each year approx. 5cm from the trunk for the outer branches, branches between each tree (hedge forming branches) would left as is to continue to provide the hedge structure. This work would be normally expected to be performed yearly ongoing around the end of the year each year as to stop the limes from partially blocking road access.

Kind regards

  
Darron Rudd
