Subject: Re: Invalid Planning Application 2023/3396

Hi there,

In response to the applications request for reasoning behind the works applied for -

The Sycamore tree in question is sited on the very top of an embankment over multiple buildings, it is very large and exposed to the elements and has some over extended sections of canopy which (given the nature of sycamore) are liable to snap out if stressed. The client is of a nervous disposition, and has requested I do something to mitigate these risks. Hence my application.

Kind regards,

Orlando Horner
