*(Meldreth Parish Council – For your information, no action required)
(Greater Cambridge Planning – Please pass to the Trees TSO Team to process the notice on UNIFORM.)*

Dear Charlie Vince,

Thank you for 5-day notice received via email on 10/11/23

I have since visited 20 High Street, Meldreth this morning and looked at the two Elm trees in question.

I managed to gain access to both gardens to undertake assessment for consideration of the 5-day emergency notice and noted that there is a pathogen fungi 3m up on the larger stem hidden by dead Ivy stems. I suspect these fungi to be *Pleuritus ostreatus* which is of significance to the trees structure if left, however fungi identification is only based on ground observations. Further observations saw other fungi within a small cavity lower down on the main stem of the same tree, identification was not confirmed.

Given both trees obvious deterioration; poor vitality, low twig density and evidence of pathogens and the notable targets, it is agreed that these trees should be managed under a 5-day notice and an exemption from the normal statutory tree work application under the T&CPA.

You can go ahead with the following work on receipt of this email. Official consent will follow in due course with details of replacement planting.

Kind regards

Adrian Sargeant
(Planning) Tree Officer
South Cambridgeshire District Council

Subject: URGENT 5 DAY APPLICATION - 20 High Street, Meldreth, England, SG8 6JU

Good afternoon,

Please can we apply for a 5 day urgent application at 20 High Street, Meldreth, England, SG8 6JU. Please find attached the relevant sketch plan and images.

T1 Elm (larger of the two) - monolith to where green growth starts at approximately 8m.

T2 Elm (smaller of the two) - monolith to where green growth starts at approximately 6m.

Reasons - Both trees are heavily in decline, most of the canopy is dead.

Kind Regards

Nina
