

Mr Andrew Housley

Dear Sir/Madam

I'm looking to building and agricultural hay barn and livestock housing as the price of plastics and the ongoing issues with the carbon foot print I'm looking to putting up a hay barn and livestock shed to help with the growing need to make things easier and to help with lambing ,general livestock health and care .

It would be 26metres away from the main road the A924 using an existing gate would need an access track down to the shed all material would be there in the red lined area for making the hard standing as it's on a mix of gravel and course sand, the access track would then be coated in type 1 from the local quarry

The planned location would be in a natural hollow in the field would need a little ground works to make level and the reform the natural look after works where completed.

The building would face NE
