From 7 January 2019, all new developments of more than 1 dwelling house or where the construction area is 100 square metres or more, require Sustainable Drainage Systems (SuDS) for surface water designed and built in accordance with the Welsh Ministers' [Statutory SuDS Standards](#). SuDS Schemes must be approved by your local authority acting in its SuDS Approving Body (SAB) role. Please contact your local authority for details of how to apply.

How will surface water be disposed of?

Sustainable drainage system

Existing water course

Soakaway

Main sewer

Pond/lake

Biodiversity and Geological Conservation

To assist in answering the following questions refer to the help text. The help text provides further information on when there is a reasonable likelihood that any important biodiversity or geological conservation features may be present or nearby and whether they are likely to be affected by your proposals.

Having referred to the help text, is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

a) Protected and priority species

Yes, on the development site

Yes, on land adjacent to or near the proposed development

No

b) Designated sites, important habitats or other biodiversity features

Yes, on the development site

Yes, on land adjacent to or near the proposed development

No

c) Features of geological conservation importance

Yes, on the development site

Yes, on land adjacent to or near the proposed development

No

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Foul Sewage

Please state how foul sewage is to be disposed of:

- Mains sewer
- Septic tank
- Package treatment plant
- Cess pit
- Other
- Unknown

Are you proposing to connect to the existing drainage system?

- Yes
- No
- Unknown

If Yes, please include the details of the existing system on the application drawings and state the plan(s)/drawing(s) references

Existing Holiday Home Park has 2 existing systems on site.
System No1 accommodates 46 units (lower site).
System No2 accommodates 79 units (upper site).

Proposed new site (9 units) to utilise Foul System No2.
Existing Septic Tank system comprising of 5 Concrete Ring chambers:
1st Chamber @ 2.7m dia x 3 rings deep = 17 cubic meters
2nd Chamber @ 2.7m dia x 2 rings deep = 11.5 cubic meters
Chambers 3 -5 @ 1.2m dia x 3 rings deep = 3.4 cubic meters
TOTAL = 38.7 cubic meters / 38,700 litres.

Approved Document Part H, item 1.18 states 'septic tanks should have a capacity below level of the invert of at least 2,700 litres for up to 4 users. Size should be increased by 180 litres for each additional user.
Based on this allowance a 38,700L system accommodates 204 ppl.

Calculations based on expected maximum user capacity.
Usual occupancy of caravan based on 1 / 2 persons, highly unlikely for all caravans to be occupied at the same time.
79 existing units + 9 new units = 88 units = 176 ppl.

This calculation demonstrates that there is adequate capacity in the existing System No2 for the proposed additional 9no units applied for here as part of this application.

Waste Storage and Collection

Do the plans incorporate areas to store and aid the collection of waste and have arrangements been made for the separate storage and collection of recyclable waste?

- Yes
- No

If Yes, please provide details:

The additional caravan units would be incorporated into the existing sustainable principles for waste management provided at the site, predominantly the separate storage of waste and the recycling of materials to help reduce the amount of waste to land fill. The General Waste and Recycling separated at source would be incorporated into the existing collection system at the holiday home park and would then be incorporated into the normal Local Authority routine for bin collection.

Trade Effluent

Does the proposal involve the need to dispose of trade effluents or trade waste?

- Yes
 No

Residential/Dwelling Units

Does your proposal include the gain, loss or change of use of residential units?

- Yes
 No
