

Diagram from previous application 21/1089/TPO produced by Alvan Kingston

Tree ID	Species	Condition	Recommendation
T1	Birch	Trunk bifurcates at 2.5m. Bark appears to be cracking along the roadside of the trunk, suggesting excessive bending in the wind.	Reduce limb in upper crown, growing towards the dwelling, to suitable growth points by a maximum of 3m. Shape the rest of the remaining crown, keeping a natural crown shape.
T2	Birch	Tree has a moderate lean towards dwelling. Crown a little sparse. Low limb overhanging and growing towards dwelling.	Reduce overhanging limb to suitable growth point by 2 to 3m.
T3	Birch	Damage on base of stem, suppressed on house side of crown.	No works at the present time.
T4		Good condition, no significant defects	No works at the present time.
