

17.11.2023

Dear Will,

Please see attached updated drawings with valid Ordnance Survey Licence number and scale bars.

The front door is shown on the current plans but for ease of reference we have updated the room annotation.

The solar panels will be designed and supplied by Jem Energy to achieve 6.0 MWk annually

With regard to the flood risk assessment this was not required for the previous application's at this property. The proposal is for a 4 sqm porch, the existing surface water drainage system will be able to incorporate this small additional capacity.

Please can you confirm if the application can now be validated.

Kind regards

Kate
