## MONO RT+ single glazing

A unique system for replacing single glazing on period properties. It's so good, it's recommended by planning authorities in even the most sensitive conservation areas.

MONO RT+ fits into even the narrowest window rebates, so it's ideal for Georgian properties. It's lightweight enough to allow the sash mechanisms to be retained, too. And even though it looks like the original glass, it reduces heat-loss and therefore cuts energy bills.

### Profile of Mono RT+

MONO RT+ is supplied as a 4mm pane of genuine hand-drawn glass, suiting the aesthetic of the period. It has no edge seals and is installed in much the same way as conventional single glazing.

### Mono RT+ technical specification

	<b>Mono RT+</b>	<b>Compared to standard single glazing</b>
Thickness	4mm	3-5mm
Rebate size required	fits any existing rebate	fits any existing rebate
Thermal (Ug value)	3.6	5.6-5.8
Weight kg/m2	10	7.5-12.5
Safety versions available	Can be toughened on request	
Glass types available	Hand-drawn glass (/genuine-hand-drawn-glass/)	

Please review our technical documents (/technical-documents-histoglass/) relating to our MONO systems.
