Dear Test Valley Planning

Re: Proposed replacement windows at Goodworth Clatford Village Club.

In my role as Chair of Trustees, I submit an application for a Lawful Development Certificate in respect of replacement windows at Goodworth Clatford Village Club.

The building was constructed in 1923 and is single glazed. The Trustees wish to improve the energy efficiency of the building with the priority being the Steward's accommodation.

I attach the following documents:

A plan of the site in the context of the village

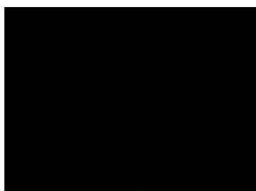

Photographs of each elevation identifying the windows to be replaced

A diagram of the proposed replacement windows designed to match the existing windows.

The western elevation of the main building is visible from the Longstock Road but the Steward's accommodation west and south elevations are hidden by fencing and are only visible from the Steward's private garden. The eastern elevation is visible from the Club grounds. There are no changes proposed for the northern elevation.

The Trustees hope that this application can be approved.

Regards

David Y Grey
Chair of Trustees
Goodworth Clatford Village Club
