Description of Proposed Works
Please describe the proposed works
. The proposed replacement of 4 No front elevation windows
2 windows on first floor approx 1300mm x 2400mm. (These windows at present have margin light sashes but originally they where the same as 21 Mercer Row which are 6over6. This can be
seen in existing sashes where they have been removed and changed to the style they are now.)
2 No windows on second floor to be made as existing 3over6 (one of the windows has been changed to an opening out flush fitting casement
which if opened is in danger of falling out due to the state it is in)
All windows would be replaced as existing and manufactured in softwood and fitted with sash weights etc. All windows would be factory face
glazed with 4mm glazing. (Toughened where required) All windows would be factory finished in white inside and out.
If possible we would like to fit draught seals to these windows to reduce the drafts and keep the heat in the rooms. This would be done by
fitting brush seals to the sashes in the best way to make them draft proof but so they are not directly noticeable from the exterior.
