

For works at Littlewood, Ballater Road, Aboyne

Aboyne

- 7 - Large Scots Pine fouling power lines and Oak tree
- 6 - Tall Scots Pine - remove
- 5 - Spindly trees - 2 x remove thin out and reduce
- 4 - Tall Scots Pine - remove
- 3 - Large Scots Pine - 20% reduce
- 2 - Large Scots Pine - 15% reduce
- 1 - Leaning Pine - remove

The 7 x replacement trees will be planted after the reduction/removal works has been completed at locations as close to the existing trees as possible. Our client has committed to maintain the replacement trees for a period of 5 years and will replace any such trees that fail during this timeframe.

The new trees will be of an approximate/average height of 6ft (1.8m). The exact variety of each of the newly planted species is yet to be determined and will depend on availability, but varietal considerations within the individual species range should make no difference provided the species choices are observed and maintained.
