--	---	---	---

Overview

High pressure green treated feather edge for external use - ideal for fencing or cladding of sheds and buildings.

When overlapped, feather edge boards create the perfect fence and can be used in conjunction with our fence rails and UC4 incised posts

High pressure treated to UC3 in an attractive green finish for improved durability

Feather Edge boards are ideal for installing fencing on undulating ground

The timber is sourced from sustainable forests

Made in the UK, supporting British industry

Please note: feather edge boards are cut diagonally from a 22mm thick board which result in a smaller finished size - this is an industry norm
