Meter Serial Number(s): **005277**

* The rate shown is the original FIT rate applicable on your eligibility start date. Please note this may change in line with RPI on 1st April every year.

FIT meter reads are requested quarterly, around mid-March, mid-June, mid-September and mid-December. You are responsible for providing meter reads to Good Energy each quarter, once received we will then validate the reads. Successful readings will be used to calculate payments, which are usually made around 8 weeks later, once payment has been received from Ofgem. For more information on the meter reads process and payments, please visit our website.
