

**Ordnance Survey Plan
Published 1979**

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey's National Grid Survey Office, Southampton, in 1954. The 1:2,500 scale was adopted for maps on urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Large-Scale National Grid Data Published 1995

Source map scale - 1:2,500

'Large Scale National Grid Data' superseded SLM cards (Ordnance Survey's 'Large Scale National Grid Data' maps) published in 1992 and replaced until 1999. These maps were the forerunners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey Archives Centre. The original maps, published in 1884, were at a scale of 1:25,000. The 1:10,560 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940s, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overlaid with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The current maps are the most recent, with new editions appearing every 10 years or so for urban areas.

The historical maps shown were produced from the Ordnance Survey's 1:10,000 scale maps which were originally published in 1970. The data which underpins the 1:10,000 maps is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.
