Samsung EHS 8kW R32 Air Source Heat Pump

Suitable for home air conditioning and connection to existing heating systems, the compact and light outdoor heating system from Samsung offers high performance and reliability even in low temperatures.

Samsung's intelligent controllers allow flexible system automation as well as boiler management and with its extremely compact size, the Samsung EHS Mono series is one of the best choices when looking for an efficient monobloc heat pump.

As well as offering quick and easy installation the Samsung EHS is up to 40 percent smaller, more compact and lighter than competitors and the Samsung EHS Monobloc heat pumps are a great solution to heating both residential and commercial properties which are capable of providing domestic hot water and space heating throughout the year.

All Samsung air source units feature a standard 2 year manufacturer guarantee, which can be extended to 7 years if fitted by a Samsung approved installer.

Features and Benefits:

- MIM Control Kit (sold separately) required unless installed with a pre-plumbed cylinder
- Quiet operation
- Compact design for easy installation
- 7 year warranty subject to registration
- High seasonal energy efficiency
- Up to 65°C water supply
- Operation range down to -25°C
- Extremely quiet operation (50db(A) at 1 metre)
- Lightweight construction ensuring many mounting options

Product Specification

8 kW

Name	Samsung EHS 8kW R32 Air Heat Pump AE080RXYDEG
Product Code	189247
MPN	AE080RXYDEG/EU
EAN	8801643844561
Type	Air Source Heat Pumps
Sub Type	Monobloc
Warranty (Years)	2
Width (mm)	940
Height (mm)	998
Depth (mm)	330
Weight (Kg)	76
Output (Kilowatts)	8
Flow Rate (L/min)	12
