

Construction Management Plan

Loading and unloading of materials

A permeable stoned hard standing will be created to allow most deliveries to be made off the public highway. Smaller vehicles that can be accommodated will be requested for deliveries. Where larger vehicles are necessary deliveries will be scheduled out of busy hours.

Parking for construction workers

Parking for three vehicles will be created on the hardstanding at the front of the site. Work will be scheduled to minimise the number of vehicles on site.

Temporary access arrangements

The site will be securely fenced with Heras fencing and construction site signage employed.

Measures to prevent dirt or other debris being deposited on the public highway

The hard standing at the front of the site will minimise dirt and debris on the public highway. The road will be regularly checked and swept as necessary.

Hours of construction working

Monday to Friday 7.30am to 5pm

Saturday 8am to 1pm

Measures to control the emission of dust and dirt during construction.

Excavation and muck away will be carried out when the ground is dry.

Cutting of masonry will be with wet machines to minimise dust.
