

**I**

### GSE IN-ROOF SYSTEM

Integration of all new PV modules generations. Until 150 mm of height adjustment possible

Pre-drilled fixing points

Simplified clamps installation: position indication

Optimized cable passaged for all junction boxes

The diagram illustrates the GSE In-Roof System, showing a solar panel mounted on a roof structure. The system includes a mounting frame with pre-drilled fixing points and simplified clamps for installation. The clamps have position indicators for easy alignment. The system is designed to optimize cable passage for all junction boxes.
