Introduction

This Design and Access Statement has been prepared to support an application for Listed Building Consent for the installation of an electric vehicle charging point at Old Plough, Church Street, Hurstbourne Tarrant, SP11 0AX

Design

In submitting this proposal, the following design considerations have been made, respecting the building's designation as a Grade II Listed building:

- Selection of the smallest available charging unit on the market, as this will have the lowest possible visual impact.
- Selecting the option of the black charging unit, as this will match nearby rainwater guttering and have the lowest possible visual impact.
- Locating the charging unit to the side of the modern garage extension, as this will have the lowest possible visual impact and will not damage the historic fabric of the building.
- Selecting the cable route with the lowest possible visual impact from the consumer unit to the EV charging unit.

Access

Access arrangements are not affected by the proposed addition of an Electric Vehicle Charger. The charging unit will be mounted at a suitable height so as to be accessible, but not vulnerable to damage from a vehicle.
