

20

22

The boundary wall and Fence and 6m trees already form a large shadow on this neighbours garden at present. The new roofline will not negatively affect 20 the mall.

After the demolition of existing garage the boundary wall will be rebuilt to match the material build type of the surrounding boundary wall. The height will also match the surrounding boundary wall on either side.

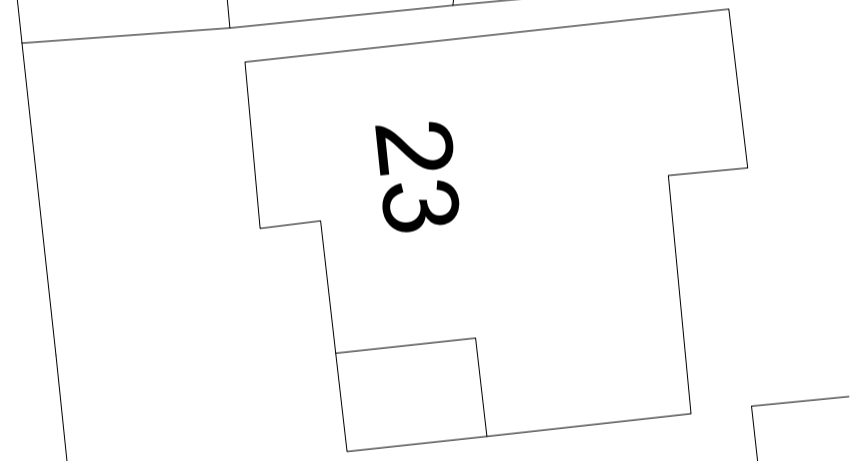

A new wall will be constructed to infill the space left by the old garage. The materials used will be the same blockwork as the existing wall and cement joints.

This elevation of the neighbours house has no windows, therefore there is no negative results from new buildings.

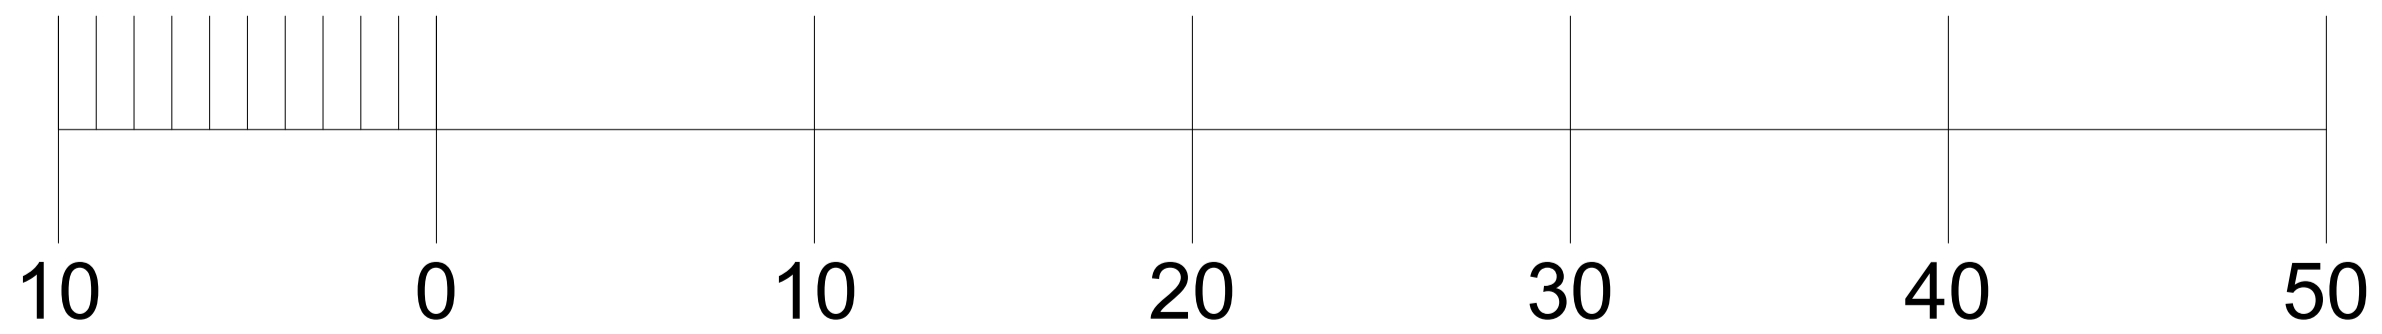

--- Shadow outlinecast from the garage
--- Shadow outlinecast from the house

The demolition of the old garage creates an improvement in the situation of the light into windows on the back elevation of the no.24 neighbour.
