

Dear Sirs,

Further to my objection email of today.

Tonight the venue has opened and there is a constant loud buzzing noise from extractor fans on the buildings rear walls together with a loud bass beat, both of which we can hear inside our property.

I have visited the premises and spoke to someone in charge and expressed my concerns.

The music level was ridiculous and we held a brief conversation in the street.

These noise nuisances must be addressed.

Kind Regards

DCJ and CA Mutch
