Proposed office and storage facility

Site:

Springfield
Holme Pierrepont
Nottingham
NG12 2LF

Design

A neat minimalist design which would sit quietly onto the site with out causing any visual disturbance to the surrounding buildings or harm the openness of the Greenbelt.

The south facing mono pitch roof maximises the capacity to generate solar energy.

The roof line is below that of the planning approval (approval 22/01385/FUL) to extend the existing building immediately to the west of the proposal.

Access

The building provides:

- level approach
- level access
- accessible WC
