SUMMARY

The proposal is for the reinstatement of bathing facilities to the attic/second floor accommodation.
It is proposed for a shower room/WC to be provided to serve the attic/second floor accommodation.
The location for the new shower room/WC was previously used as a bathroom, that was provided within the 1930s refurbishment of the building.

Image above shows a view looking west into the space to be reinstated as a shower room.
Note the wash-hand basin remains in-situ.

All underground utilities identified during the field work should be investigated and where possible, any services of the type, size and route before commencing work on site. Any services should be identified and if critical should be verified by an independent contractor. The general cost estimates are average values obtained by reference to the general specification and address the kind of work identified.
