VECTORWORKS EDUCATIONAL VERSION

General Notes:

1. Figured dimensions are in millimeters, levels in metres and are to be checked on site prior to all contractors commencing their works. Areas are in metres. Any areas indicated are approximate and indicative only. P

2. All Architects drawings are to be read in conjunction with Structural Engineer's and Mechanical & Electrical Engineer's drawings and specifications.

3. Any discreapancies to be reported to the Architect in writing prior to any works being carried out.

4. All products to be installed to manufacturers specification and recommendations. 5. All construction to comply with current building regulations.

6. Contractor to carry out delapidation survey prior to any works being carried out.

7. To make good is to return the noted to a state that is equal or better than that noted in the delapidation survey, to return noted to working order or to do any necessary works to fit with surrounding finishes.

8. Where building components are described in the specification as contractors designed, the information contained within these drawings represents the design intent for materials, components and specialist systems only. Development of these items was not possible during the pre-construction phase. The detailed design of these items will require development and validation by the main contractor and associated subcontractors. All design should conform to project specifications, manufacturers recommendations, British Standards, Codes of Practice, Local Authority Regulations, Surveys and Environmental Data. Please note that if drawings conflict with any of these documents/bodies, the contractor should advise the architect immediately.

9. Tye Architects cannot guarantee the quality, content and completeness of this drawing in dwg / dxf formats, therefore, please refer to PDF or paper version for accurate representation of the information contained within this drawing.

10. Drawing only to be used for the purpose specified.

CDM 2015 IMPORTANT:

Ensure this drawing is read in conjunction with all other hazards / risks noted within the associated design risk registers and construction phase H&S plan.

Significant hazards relating to the architectural design have been appraised with reasonable skill and care and are identified on this drawing using the above warning triangle.

Significant hazards are defined by the HSE as those that not necessarily involve the greatest risks, but those (including health risks) that are:

- not likely to be obvious to a competent contractor or other designers. unusual.

- likely to be difficult to manage effectively.
