TYPICAL EXMAPLE OF THE PORCH

Marley Eternit Cedral Thrutone man made slates are a low-profile fibre cement slate that feature a smooth surface and square cut edges for a sleek, aesthetically pleasing finish.

Eternit Cedral Thrutone fibre cement slates are the strongest slates in the market, tough enough to withstand the most volatile weather conditions making them popular with architects and roofers.

These slates provide complete design flexibility & are particularly suitable to complex roof geometries, with low wastage and ease of installation, it's easy to see why it is the slate of choice for all types of new build and refurbishment projects.

Used on a variety of applications, Thrutone slates provide the flexibility to create inspirational roofs and facade

Natural Roofing Slates

There is no other material for roofing such as slate. It is capable of enduring extreme temperatures, difficult snow formation, fire-resistance (A1) as well as being fully waterproof. If thinking of a long-term roof with no maintenance, roofing slates are the most suitable option.

As a durable and weather-resistant product it's colour and sheen does not change over time, even in the harshest of conditions.

With its 100 year life span and low embodied-carbon content, natural slate is the most ecological option vs. other roofing alternatives according to Life Cycle Analysis by the University of Bath.

Original London Stock are high quality yellow handmade bricks with authentic coal spotting, offering a true reproduction of the traditional London stock bricks.

Featuring a strong colour and subtle shade variations, these bricks are ideal for matching brickwork in London and the surrounding counties, as well as being a popular choice for new build developments.

Available in 68mm imperial and metric sizes, fully frost resistant and manufactured to BS EN 771-1 standards.

Constructed from a high-quality Composite material that is Capped, our Slatted Cladding Trims benefit from having resistance to weathering, staining and mould. These properties, alongside being rot resistant, give your Cladding project long lasting appeal.
