## MANURE MANAGEMENT PLAN

This manure management plan has been prepared for Morton Ley Farm, Morton, Oswestry, Shropshire, SY10 8BG.

All manure produced by the proposed development will be taken to a local AD plant.

The manure management plan has been prepared for the total stock of 270,000 broilers.

The total produced on the farm is 89,100kg N, and therefore manure will have to be exported (Table 1).

89,100 kg N will be exported to AD plants (see letter appended below).

Table 1:

Stock Unit	Stock Numbers	Kg N per Stock Unit	Total Kg N Produced
1000 broiler places	270	330	89,100
Total Kg N produced			89,100

The manure storage and disposal will also need to accord with DEFRA's Code of Good Agricultural Practice for the Protection of Air, Water and Soil.

### Contingency Plan

There are a number of covered areas on the farm to allow for storing any manure for when the manure can not be exported off site e.g. due to frozen conditions.

**To Whom it may Concern**

I confirm that we are willing to collect poultry manure from the new proposed broiler units at JP & HR Edwards, Morton Ley Farm, Morton, Oswestry, SY10 8BG

We have the ability to remove and store the manure as soon as the birds are taken from the sheds.

We use the manure to feed our anaerobic digester, generating renewable heat and electricity.

Yours faithfully,

Simon Gittins  
Managing Partner  
W.H.Gittins & Sons
