### General Tree Assessment (Detailed)

**Tree ID: T1**      Common Lime  
*Tilia europaea*

**Tag:**      **Assessor:** R Fox and R Rose  
**TPO:** MS42/ G1      **Date:** 14-Aug-23

**Tree Comment:**  
**Survey Comment:** Lime on entrance to Malt Close. Limited visual inspection of basal area due to excessive epicormic growth. Major cavity North side from basal area extending up 1m and into stem, 60cm width, cavity extends far into stem. Due to location and extent of decay recommendation to fell.

**Date:** 14-Aug-23

**Tree Comment:**

**Survey Comment:** Bifurcation at 2.5m, good union. Previously reduced. Major deadwood in c anopy. Cavity @ 12m West with decayed area. Small basal cavity North side probed to 10cm, monitor for further signs of decay. Early signs of apical dieback and Leaf miner discolouration to foliage. Reduce South West limb with cavity back to growth point below cavity. Remove all amjor deadwood. Reduce crown by 20% and rebalance canopy.

**TPO:** MS42/G1      **Date:** 14-Aug-23

**Tree Comment:**  
**Survey Comment:** Situated on Eastern boundary growing in hedging and fencing. Exposed buttress roots with raised area of soil around basal area. Debris around basal area to be removed. Major cavity from old pruning wound @ 4m and 6m East side. Extended limbs weighted East towards neighbouring property. Small cavity North side basal area probed to 5cm. Cavity South West basal area with decay probed in and down 20cm. Bark inclusion from cavity basal area up to 2.5m. Cavity North West in stem @ 1.2m 30cm long 10cm wide monitor for further signs of decay. Due to location and distance to neighbouring property reduce to lessen risk of failure and reduce stress on basal cavity.
