**Tuesday, December 12, 2023**

Dear Catherine,

Further to my site visit at the above address I can confirm that Cut Above Tree Management Ltd. will be able to carry out the following tree work in the rear garden of the above property:

- T1 - Medium size Goat Willow tree next to house. Tree has outgrown its location and is causing shading to the rear of the house. Section fell to ground level.
- T2 - Medium Plum tree next to house. Tree is very tall and should be removed to open up the garden. Section fell to ground level.
- T3 - Large multi stem Plum tree. Remove stubs, crown thin canopy by 20%, remove crossing branches and remove dead wood.
- T4 - XL Apple tree. Remove dead wood, crossing branches and any historic stubs.
- T5 - Medium Ash tree to side of summer house, tree is growing in the wrong location and should be removed as too close to the summer house. Section fell to ground level and poison stump.
- T6 - XL Apple tree. Remove stubs and significant dead wood from lower canopy.
- T7 - Small twin stem Ash tree, significant included bark. Remove to ground level.
- T8 - Remove and grub out stump of Black Elderflower tree as is very light suppressed and not a great specimen.

If you need any further information, please feel free to contact me on my mobile at the bottom of this page. I look forward to hearing from you.
