

To whom it may concern.

Following communications and discussions with CoCity Developments Ltd in relation to their proposal for their Alba Gate redevelopment, we are happy to see plans which bring much needed support to the expansion of EV charging availability within the Aberdeen and wider North-East regions of Scotland.

As a local and regional business that has a firm commitment at both venue and group level to sustainability P&J Live would welcome these developments and the associated plans which support and encourage the wider use of electric vehicles.

Yours sincerely

RS Wicks

Managing Director
